PROFESSIONAL SUMMARY

Backend Developer with 3.5+ years of experience building and maintaining web applications and automation systems. Skilled in Django and FastAPI, with hands-on experience in asynchronous systems (Celery, Redis, WebSockets), AWS cloud deployment, and AI agent integration using Ollama and LLMs. Also comfortable working with React and Next.js for basic frontend support. Delivered production systems for ISP billing, identity verification, and telecom orchestration.

TECHNICAL SKILLS

Core Programming: Python, AsyncIO

Backend Frameworks: Django, FastAPI, Django REST Framework, Flask, Celery, WebSockets / Django Channels

Cloud & DevOps: AWS (EC2, S3, RDS, ECR, Lambda), Microsoft Azure, Docker, Nginx, Gunicorn, CI/CD, Load Balancing, Heroku

Databases & Caching: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis (caching & message broker)

Third-Party Integrations: Stripe, Razorpay, PayPal, Xero API

Frontend (Basic Working Knowledge): React.js, Next.js

AI & Intelligent Automation: AI Agents, LLM Integration (Ollama), NLP, OpenCV, n8n, Zapier

Tools & Practices: Git, GitHub, Bitbucket, Cursor, Agile

PROFESSIONAL EXPERIENCE

Python Developer — Backend & AI Automation

Laxmi Narayan (LN) Webworks Pvt. Ltd., Ludhiana, Punjab

March 2025 – Present

- Engineered asynchronous task processing pipelines using Celery, Redis, and FastAPI, cutting high-volume background processing latency by 40%.
- Containerized microservices with Docker and AWS (ECR/EC2), configuring Nginx/Gunicorn load balancing that sustained 99.9% production uptime.
- Implemented AI agent pipelines (Ollama/LLMs) to automate data extraction and downstream workflow triggers, cutting manual processing time and freeing the team to focus on higher-value work.
- Delivered WebSocket-based real-time features for web and mobile apps, plus integrations with payment gateways, Xero accounting, and email systems.
- Developed and maintained backend systems for the TradeConnect Portal, ISP Billing Portal, and RWTS Identity Verification Platform, with light React work on admin dashboards.
- Mentored junior developers on Django best practices, system design, and security, raising the team's overall code-quality standard.

Python Django Developer

Tekki Web Solutions, Ludhiana, Punjab

August 2024 – February 2025

- Engineered backend services for LivWell, an insurance portal platform covering policy management, user onboarding, and claims workflows, reducing manual handling for the operations team.
- Integrated Stripe and Razorpay payment gateways to support secure, multi-provider premium payments, reducing failed-transaction follow-up and simplifying reconciliation.

Python Developer

Aviox Technologies Pvt. Ltd., Mohali, Punjab

March 2023 – August 2024

- Created and maintained backend applications in Django and Flask following RESTful API design patterns.
- Managed relational (PostgreSQL, MySQL) and NoSQL (MongoDB, DynamoDB) databases with optimized query strategies.
- Automated repetitive operational workflows using Python scripts, improving team productivity by 20%.
- Deployed applications on AWS (EC2, S3, RDS) and Heroku; established Docker and CI/CD pipelines for reliable, scalable releases.

KEY PROJECTS

Trade-Connect Portal (Telecom Orchestration) — *Django, Celery, Redis, Superloop API, SMILE API, React (basic)*

- Delivered the backend and services through production deployment; supported the admin console with basic React work.
- Engineered a telecom service orchestration platform with real-time NBN diagnostics and service syncing.
- Designed a customized Jazzmin admin dashboard with role-based access control for centralized management.

RealWorldNetworks – ISP Billing Portal — *Django, Celery, Xero, Redis, React (basic)*

- Architected a complete ISP billing system from scratch, automating invoicing via the Xero API and eliminating manual billing cycles.
- Implemented pro-rata billing algorithms, automated financial reports, and real-time tracking dashboards, with light frontend support.

RWTS Identity Verification Platform — *Django, RapidID API, React (basic)*

- Developed a secure identity verification system integrating the RapidID API, supporting 11 Australian identity document types.
- Achieved 98% verification accuracy through robust validation logic and exception handling; supported the admin dashboard build with basic React.

Talento – Job Portal — *Django, PostgreSQL, REST APIs*

- Developed backend services and authentication modules, optimized database queries, and integrated external APIs for job-matching and application workflows.

In-House HR Salary Calculator — *Django*

- Designed a payroll system that calculates salaries per company policy, automating deductions, bonuses, and leave adjustments, and reducing manual payroll errors by 90%.

Red Globe Productions – Calendar Sync Engine — *FastAPI, Celery, Current RMS API*

- Created a smart automation system syncing rental opportunities into unified ICS calendar feeds.
- Implemented timezone-aware scheduling, intelligent data mapping, and conflict-resolution logic.

WebSocket Chat Application — *Django Channels, Redis, WebSockets*

- Architected a real-time chat system using Django Channels with Redis as a channel layer for message broadcasting and presence tracking, supporting concurrent multi-room sessions.

Additional Projects

- IQ-Detector (Django, REST APIs): Implemented backend logic and APIs, integrated third-party services, and tuned performance for low latency.
- Hagey Game Studio (Django, REST APIs): Established backend logic and RESTful APIs, managed database schemas, and implemented unit testing.
- AI Interview Bot (Django, REST APIs): Delivered a Django web app with real-time interview features, backed by unit tests and clean, reusable code.
- Pharma AI (Django): Refactored and optimized existing Django code, fixed bugs, and implemented compliance-related updates.
- Automation Scripts (Python): Created data-scraping and processing scripts with robust error handling, reducing repetitive manual work.

EDUCATION

Bachelor of Science

Govt. P.G. College, Ambala Cantt — 2018

INTERNSHIP

Python Developer Intern

Pyspiders, Bangalore, Karnataka

2022 (6 Months)

- Developed small full-stack applications with Django, gaining hands-on experience with models, views, and authentication.
- Completed a Python Development Certification through Pyspiders during this period.
